The game starts kinda good for a low priced game , but early on you can see that the game is not good at all The game bugs like crazy , saving points are way too messed up and you get stuck in a loop after the "tutorial" part of the game .. Okay, after all the wondering every ♥♥♥♥♥♥ chapter and struggling with finding the code for the elevator plus all the glitches in the game if you finish it, it is a pretty good storyline after all and there are some pretty good jumpscars in the game as well.

pros:

- good jumpscars
- good storyline
- gives you the spoops
- decent graphics for a cheap game
- you need to think, because there are a lot of puzzles in the game
- saves your progress
- creepy music and good(scary) surroundings
- it is similar to cry of fear (you will notice when you reach the end of the game if you have played cry of fear)

cons:

- only 1 save slot for the progress and you can't go back once you are already somewhere and you need to start a new game
- the save slot glitches sometimes and you need to start some levels all over again
- you die at certain places in the game just with no reason
- you need to think a lot just to find some codes and stuff
- a lot of glitchy stuff and chapters as whole
- you need to separate at least 1-2 hours from your time to finish the game, which is no longer than 15-20minutes

However i would recommend this game due to the reason that i had a lot of fun and it scared me, even though i had to spend 2 hours from my time to complete it.

If you are wondering around the game and you need any of the codes i have them, so do not hesitate to contact me for them :). I died on the curtain and game crash when i went to bed. Runtime error 105. This is an actual FPS creator game..

<https://youtu.be/0G4hubYqkPE>

Stability issues aside, this horror game is a hodgepodge of assets that blur the games setting location and time. The lack of narrative hooks make the puzzle solving feel hollow.
